

### **BDO BC Excel is Growing**

Mr. Dragan Popović, BDO BC Excel chairman, is pleased to announce its company's expansion. As a result of a continuing growth, on Monday, 20 October 2008, we commenced the training of our first year auditors.

Ten new auditors have been selected from a remarkable group of applicants. The majority of them have graduated from the Faculty of Economics in an expeditious amount of time with an extraordinary average. It was quite difficult to make such a selection, but we were led by dedication, willingness and commitment to work that we identified in our new hires.

During the first three weeks our new auditors will learn from the best auditors and partners within the company. This three week course combines tax, audit and accounting classes that will help them improve and establish in the business world. They will be faced with a challenge to fulfill our clients' wants and needs. However, our team of people backed with the BDO tradition, will help make our clients requests achieved.

In the last three years we were able to hire over 40 auditors. Despite the financial crisis that strongly shook the world in the last few months, we as a firm have been growing constantly. At the end of October 2008, our company will get closer to a magnificent number of 100 employees.

Considering that Republic of Serbia economy is going through the process of privatization, including the popularity of the Serbian market for investors, we want to give better service than ever to our current and future clients. Therefore, we strive for further growth, both internally and externally.
